NINK®-Ag series aremade up of surface modified nano-silver which is developedby a unique technology of ABC NANOTECH. Fine-pitch conductive lines can be demonstrated on the various plates, such as olycarbonate, polyester, polyimide, and ceramics, by using NINK®-Ag series. Nano-sized silver particles can be sintered at lower temperatures, around 150°C, than microsized silver particles can. NINK®-Ag series are applied to conductive line formation in the shorter process than existing conductive line formation methods." .html)

Here are Petri dishes showing the reduction in bacteria after treatment of water with LaundryPure™Imagine the power of up to 400 billion silver ions dissolved in water to make a super cleaning solution that penetrates your clothes at an almost molecular level. These silver particles can help sanitize fabrics throughout the life of the washing machine, providing a 99.9% sterilization rate of up to 650 different types of bacteria. Laundry remains bacteria-resistant for up to 30 days as the silver ions bind themselves to the fabric fibers. 				http://www.agion- tech.com/markets.aspx?id=164	"When used according to directions, Agion SilverClene24 instantly disinfects surfaces—and keeps them 99.999% sanitized for up to 24 hours after application*. Agion SilverClene24 has been proven effective against dangerous bacteria, viruses, and fungi. It is even effective against such troublesome microbes as MRSA, VRE, HIV, Influenza, Rhinovirus, Poliovirus, and Trichophyton mentagrophytes (athlete's foot fungus). SilverClene24 is ideal for hospitals, schools, and anywhere cleanliness and hygiene are a concern. Use it to clean hard surfaces and objects such as walls, floors, sinks, toilets, cabinets, tubs, showers, doorknobs, light switch covers, telephones, appliances, bed frames, wheelchairs, over-bed tables, examination tables, waste containers, tables and chairs"
